Career Objective

Aspiring Full-Stack Developer with hands-on experience building responsive web applications and working on real-world AI automation projects. Passionate about creating practical solutions through continuous learning and project-based development. Seeking an opportunity to contribute to a collaborative engineering team, gain industry experience, and grow as a software developer while delivering meaningful impact.

Technical Skills

Languages: C++, JavaScript, SQL, C
Web Technologies: HTML5, CSS3, Responsive Design, React.js
Tools & Platforms: Git, GitHub, GitHub Copilot, VS Code, n8n
Core Concepts: Data Structures & Algorithms (DSA), File Handling
AI & Automation: n8n Workflow Automation , AI Agent Workflows , Prompt Engineering

Professional Experience

AnantKaya **May 2026 – Present**
AI Automation Specialist (Internship) *Sirohi, Rajasthan, India (On-site)*

- Design and build AI-powered automation workflows to streamline recurring business processes and reduce manual effort.
- Apply prompt engineering techniques to develop and refine AI agents that support day-to-day operational tasks.
- Collaborate on automating business processes end-to-end, contributing directly to improved operational efficiency.

Projects

AI Tools Directory | [Live Project](#) Mar 2026

- Designed and built a responsive, fast-loading web directory enabling users to discover and explore AI tools across categories including Writing, SEO, Marketing, and Design.
- Implemented a keyword and name-based search feature, allowing users to quickly locate relevant tools without manual browsing.
- Structured the tool catalog into clearly organized categories, improving navigability and overall user experience.

Weather App | [GitHub Repository](#) Feb 2026

- Built a responsive weather application using HTML, CSS, and JavaScript that lets users search any city for real-time conditions.
- Integrated the OpenWeather API to fetch and display live temperature, humidity, and weather condition data.
- Implemented dynamic DOM rendering and robust error handling to gracefully manage invalid searches and failed API calls.

Kanban Board | [GitHub Repository](#)

- Developed an interactive Kanban-style task management board supporting full drag-and-drop functionality across columns.
- Organized workflow into Todo, In Progress, and Done sections, enabling intuitive visual task tracking.
- Implemented dynamic, real-time task counters for each column to reflect workload at a glance.

Education

Mohanlal Sukhadia University, Udaipur **2025 – 2028**
Bachelor of Computer Applications (BCA)

Certifications

- **C Programming Certificate** — Simplilearn *Feb 2026*
[View Certificate](#)
- **Introduction to Prompt Engineering with GitHub Copilot** — Microsoft *Nov 2025*
[View Certificate](#)
- **SQL (Basic)** — HackerRank *Oct 2025*
[View Certificate](#)
- **AI Workshop** — Be10x [View Certificate](#) *June 2025*
